NLP.

/ noun/ Computer Science

Natural Language Processing is the application of machine learning algorithms to the analysis, understanding, and manipulation of written or spoken examples of human language. *Abbreviation: NLP*

"limitation of liability", "waiver of consequential damages," "carve-out for gross negligence," and "actual and direct losses" are the same concept. Incorporate **natural language processing** to learn the patterns to identify the topics across millions of documents, regardless of the exact vocabulary used.
