

THEIA is an all-in-one financial tool that enables companies to better understand their business operations and expenses, provide corporate cards and move money around the world without friction. Our target market includes all but the largest companies, from small businesses to large corporations.

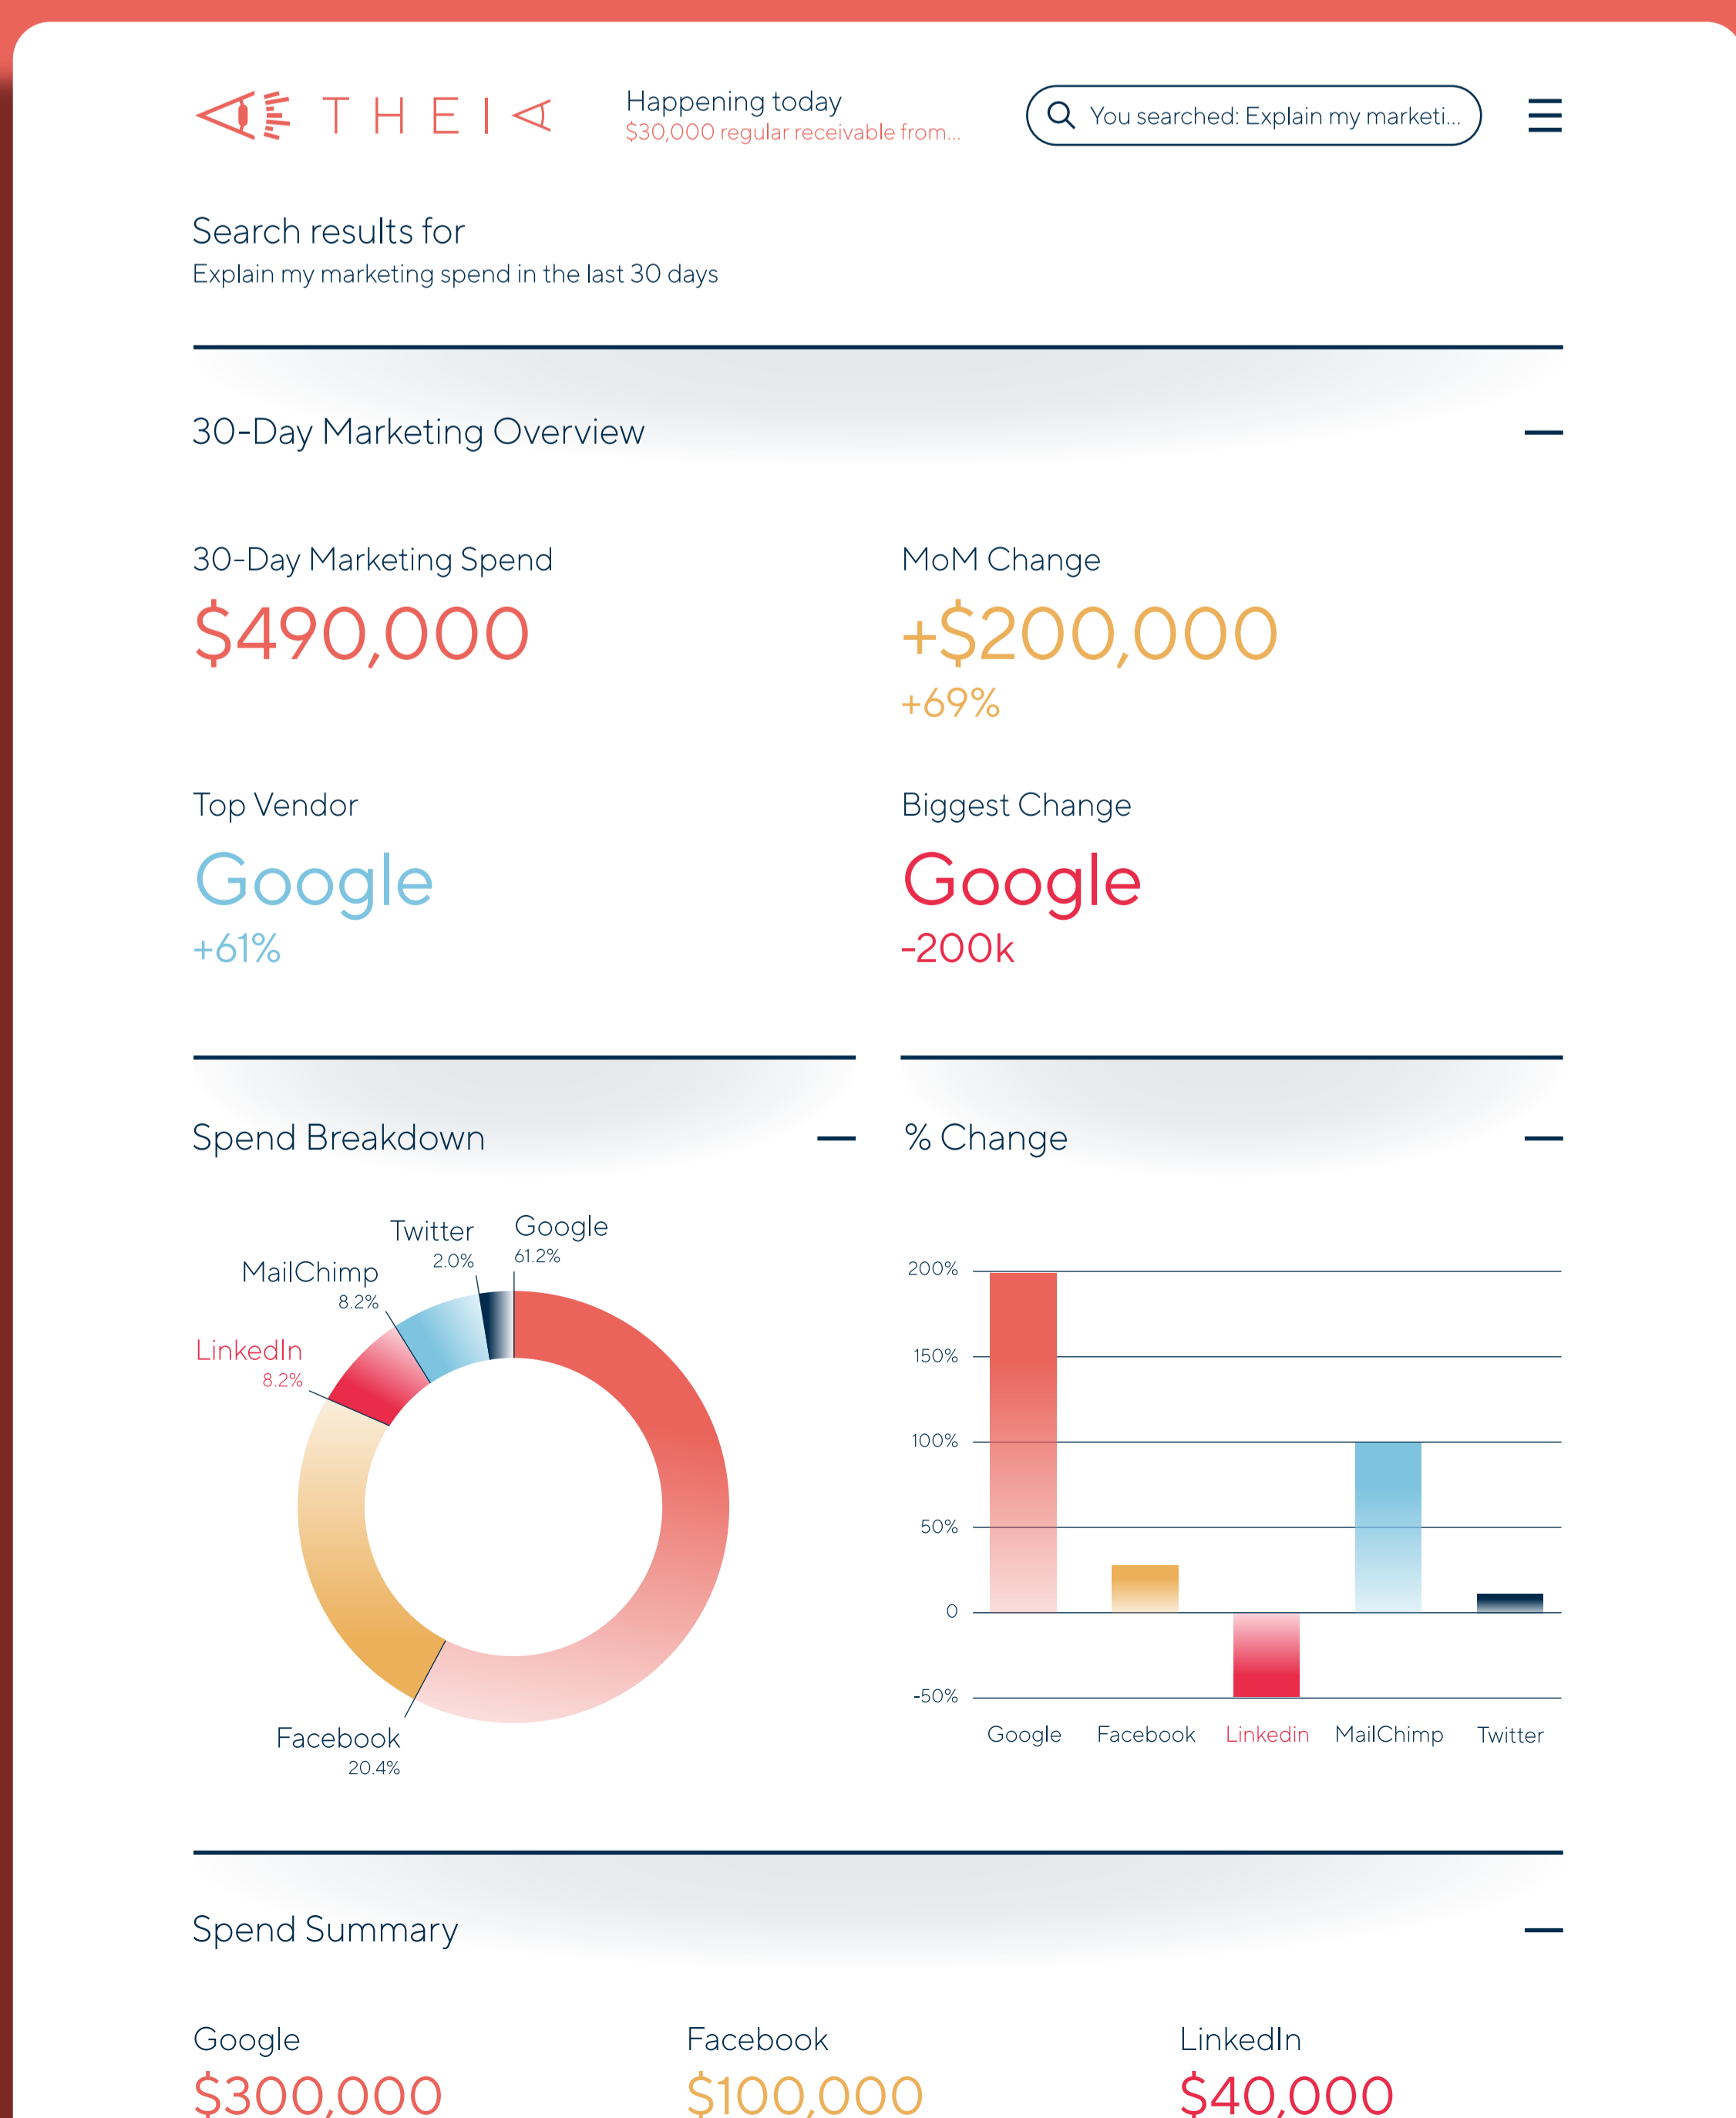

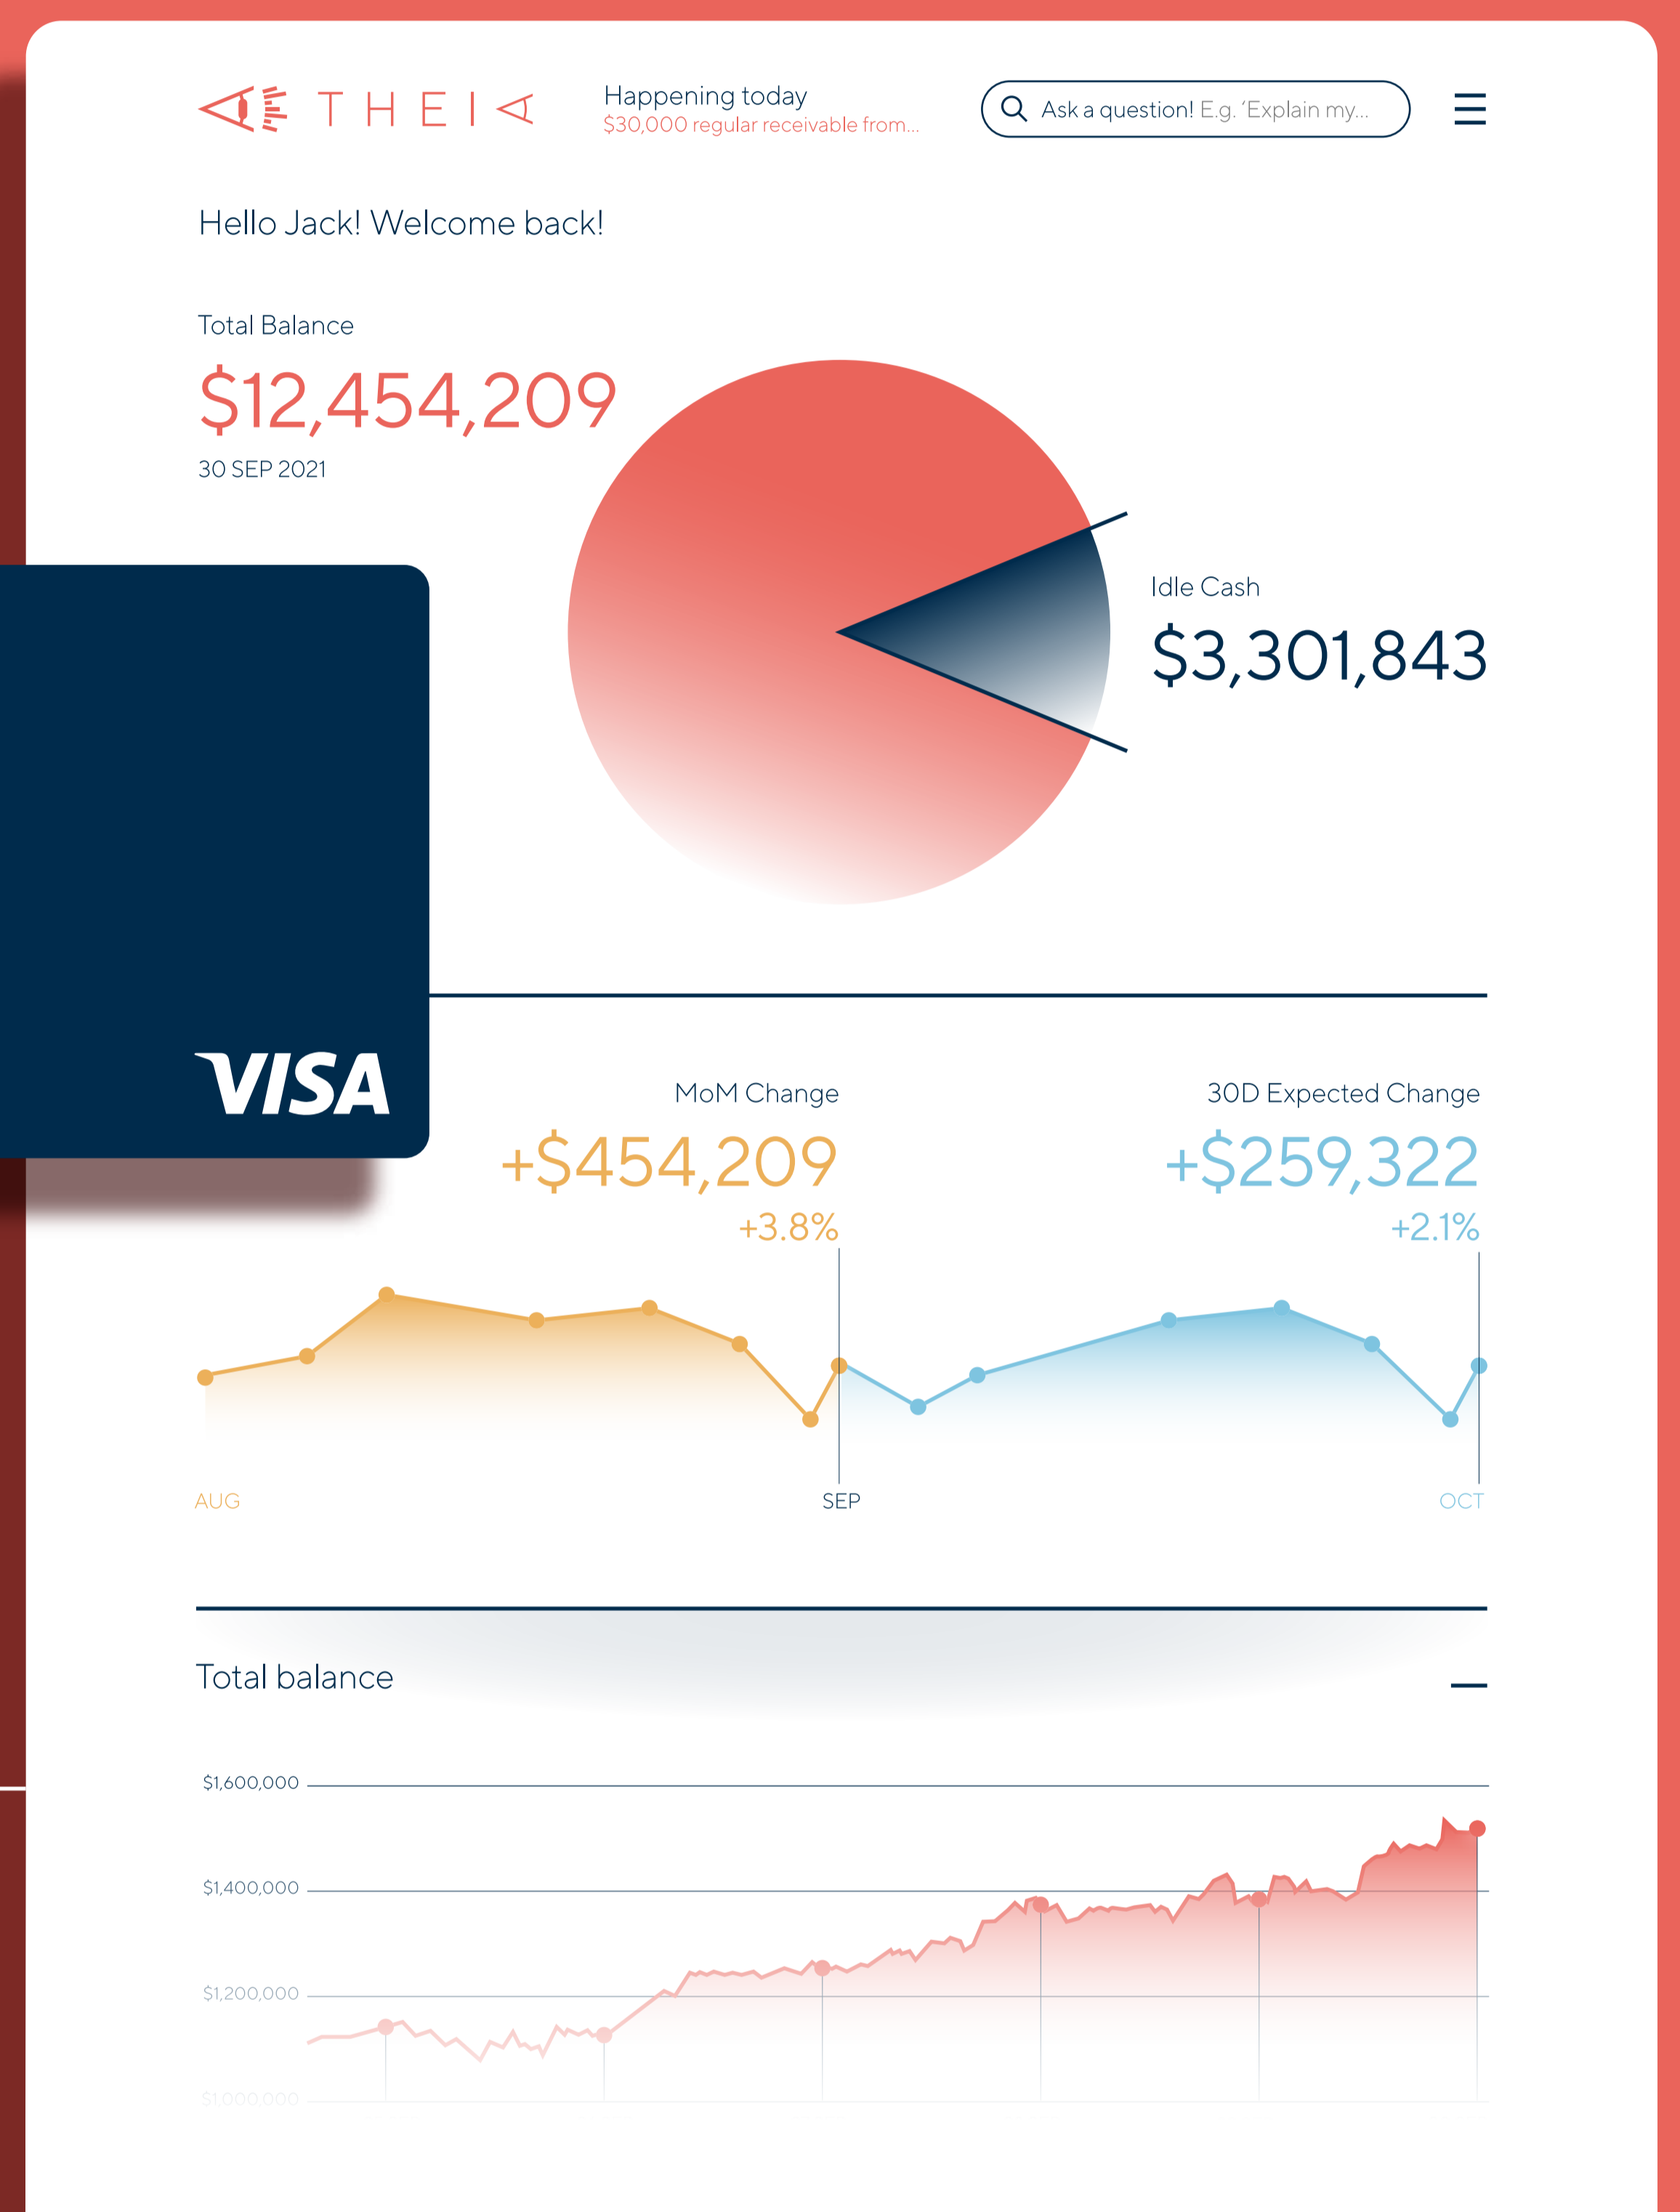

### THEIA cards

With THEIA cards, users can pay business expenses in any currency and build business credit that would not have been available to many smaller businesses through traditional banks.

### THEIA FX

These payments are automatically fed into THEIA's expense management system, which also links to accounting software to show a complete picture of revenues, costs and profits, so users can operate with confidence. With THEIA FX, businesses operating in multiple currencies can exchange and transfer currencies smoothly and cost-effectively.

### Advanced analytics

In addition, THEIA uses advanced analytics to provide smart features such as alerts, expense controls and working capital optimisation.

### Our goal

Our goal is to be a one-stop shop for business owners to understand exactly what is happening in their business on a micro and macro level.
