ECOLOGICAL TRANSFORMATION, THAT IS OUR

PURPOSE

Ecological transformation means acting to reconcile human progress and environmental protection.

We develop and implement locally solutions to depollute our vital resources and preserve them from depletion, solutions to decarbonize our ways of living and producing and adapt them to the consequences of climate change.

All over the world, attuned to local cultures, we strive to improve the health and quality of life of communities.

At Veolia, we tackle economic, social and environmental issues as an inseparable whole to the benefit of the largest number of people.

Resourcing the world

MULTIFACETED PERFORMANCE INDICATORS

Veolia's commitment to multifaceted performance is a driver for in-depth transformation, based on a balance between economic, social, and environmental imperatives. This concept is at the heart of the company's organization and operations.

UN Sustainable Development Goals (SDGs)

Veolia plays a part in all 17 SDGs at different levels and has a direct impact in 13 of them.

1,967,000 tonnes of GHG emission avoided (eq. CO2)^

Veolia's ambition to be the champion of ecological transformation is immensely prominent in Asia, where projects throughout the region save around 2 million tonnes of greenhouse emissions every year, while serving vital industries and burgeoning municipalities with dependable water, energy and waste solutions.

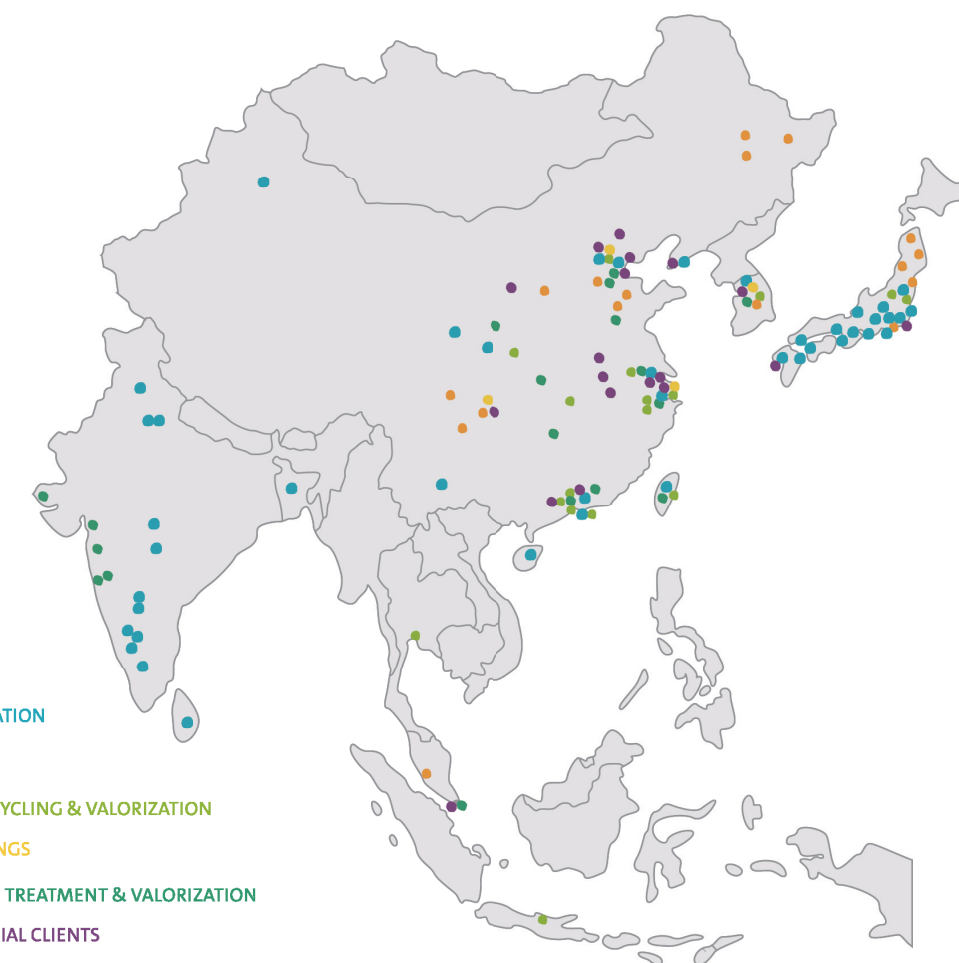

^data consolidated by 31/12/2022

27,424 employees in 7 business units*

Across seven business units - Mainland China & Macau, Hong Kong, Taiwan, India, Japan, South Korea and Southeast Asia - Veolia Asia offers a full spectrum of water, waste and energy management services, including water and wastewater treatment, commercial and hazardous waste collection and treatment, energy management, resource recovery and on-site services to empower industry to meet the most challenging growth targets on the planet.
