ACOUSTIC CAMERA

聲用機 Acoustic Camera

環保署推出創新的便攜式"聲學相機",用於調查工業和商業噪音。環保署可以一目了然地"看到"並找到最嘈雜的源頭,特別適用於噪音複雜環境、黑暗環境以及多噪聲源情況下。環保署調查人員利用便攜式"聲學攝像機",過去兩年已成功處理約百宗有關複雜工商業噪音的投訴。相關調查效率大幅提高。

EPD introduced an innovative portable "acoustic camera" to be used to investigate industrial and commercial noise. EPD can "see" and locate the noisiest sources at a glance! It is particularly useful in locating the major noise sources in complicated environments, dark conditions and situations with multiple noise sources. With the portable "acoustic camera", investigators of the EPD have successfully handled about 100 complaints about complicated industrial and commercial noises in the past two years. The efficiency of related investigations has been greatly improved.
